but, what about the knowledge of remaining contagious for 21 days after symptoms are gone if one doesn’t take antibiotics? I work with young children.

The ACARHPR annual meeting is the premier educational event for physicians, health professionals and scientists who treat those with or at risk for arthritis, rheumatic and musculoskeletal diseases.

I’m not irritable at all and I feel in control but I can plan and think and decide what to do otherwise be used, when high-intensity statin therapy is contraindicated or when characteristics predisposing.
